

2026 Customer Training Event

January 14th

Introduction 8:00am-8:10am

Presented by: Tyler Vienhage

Teejet Technologies 8:10am-9:00am

Presented by: Mike Powers

Mike will be covering spray nozzle technology and how to make the correct choices for chemical efficiency. He will also cover the basics of spray tip calibration and drift control. Mike will also have a demonstration of drift control via laser pattern with water and wind factors to show importance of droplet size and pattern to control drift.

WSDA 9:00am-10:00am

Presented by: Carl Hendrickson

Carl will be talking about new label/ federal requirements. His presentation will cover Bulletins Live 2, how to use it and what it means for applicators and a discussion on some changes coming to licensing requirements.

Break 10:00am-10:15am

Applicator Safety and Maintenance 10:15am-12:00pm

Presented by: Bill Vienhage

Bill will be covering safety and Maintenance of Liquid or Dry Application Equipment. Machine operation, Daily inspection process and grease points. Bill will also have a presentation of what NOT to do when operating and applying chemicals and the importance of safety.

Lunch 12:00pm-1:00pm

WA State Patrol 1:00pm-2:00pm

Presented by: Robert Tripp

Robert will be going over "Driver Responsibilities". He will cover WA Law around CMV and CVSA inspections as well as the 7 Basics of Safety. He will also cover load limitations and weight restrictions based on axle rating and overall length with permits.

Noxious Weed Board 2:00pm-3:00pm

Present by: Jay Johnson

Jay will be talking about proper weed management and application. He will also be talk about various new weeds to the PNW and how to manage them.

Bayer Crop Protection 3:00pm-4:00pm

Presented by: Nathan Groth

Nathan will be covering applications of Bayer Products such as; PowerMax 3, Luna Pro, Luna T, Velum Rise, Velum Prime, Huskie, Huskie FX, Oberon, Movento HL, Diflex, and Laudis. He will also cover spray drift management and proper spray tip use for effective chemical application.

January 15th

Introduction 8:00am-8:10am

Presented by: Tyler Vienhage

New Leader Manufacturing 8:10am-9:00am

Presented by: Andy Russ

Andy will be going over New Leader Spinner Spreaders. Andy will also be going over proper blade adjustment as well as spinner frame adjustment based on product density and size for precision pattern application. Andy will also go over new ISO product controller setup and calibration for spinner application.

Field Ops 9:00am-10:00am

Presented by: Jamie Main

Jamie will be talking about CNH FieldOps and its pivotal role in enhancing agricultural efficiency and customer satisfaction. Jamie will also explain how the integration of advanced data analytics, real-time equipment monitoring and remote diagnostics allows CNH to provide proactive support and minimize downtime and reducing operational costs by proactively managing fleet.

Break 10:00am-10:15am

Wilger 10:15am-11:00am

Presented by: Craig Bartel

Craig will cover tip selection via Tip Wizard and how this directly effects drift management to produce maximum yields of chemicals applications based on droplet size with conventional or pulse width modulation systems.

Raven/CNH 11:00am-12:00pm

Presented By: Peter Franz

Peter will be going over Viper 4 calibration and operation. He will also go over various components of the Raven System such as Autoboom XRT, Hawkeye II/Aim Command Flex II and Sidekick Pro Injection and how they play a part in Precision Application.

Lunch 12:00pm-1:00pm**Salford 1:00pm-2:00pm**

Presented by: Darin Croatt

Todd will be going over the RA-885 air boom fertilizer spreader. He will cover operation and setup including spread pattern testing and calibration testing for precision application.

CASE IH Precision Ag 2:00pm-3:00pm

Presented By: Nick Briese

Nick will be going over the new Patriot 50series Sprayer and the new technology on the machine to increase precision application for crops. He will also go over the new hydraulic system and suspension and how this has increased the Patriot machine's ability to climb hills. He will also go over new Sense-Apply system and its ability to cut chemical cost by only spraying weeds via variable rate, green on brown spot spraying and base+boost application.

Q&A/QUIZ 3:00pm-4:00pm
